

Welcome to Construction Plant Operations

Introduction

Firstly welcome to Construction Plant operations, we are really looking forward to meeting and working with you in the coming weeks.

Plant operations are the foundations to all construction operations. You may have previous experience or completely new to heavy plant operations, wherever you are you can be assured we have the equipment technology and experience raise and maintain your skills to the highest level expected in the modern construction environment.

As a kick start to your learning journey included are some useful links to give you an insight to construction plant operations.

Understand different types of Construction Plant

Visit the JCB web site and understand the different types of machine

<https://www.jcb.com/en-gb/products>

<https://www.youtube.com/watch?v=Ev1wa0wRpqk>

Visit the CITB web site and see the different levels of competence issued.
